

My budget planner

Track your spending, set goals and take control of your money.

Make money work for you

Before you begin

You'll need

- Information from your bank statements
- A calculator. If you have a smartphone or tablet, there'll be one on there.

What you'll do

Each section will tell you how to get the information you need from your bank statements.

You'll need to add your money in or out of your accounts into the relevant sections. The budget planner will add things up as you do.

This will show you if you're putting more money into your account than you're spending or if it's the other way round.

Barclays don't provide specific, personalised financial advice. Individual circumstances can vary, so we recommend that you get professional advice if you need it.

Money in

What you need to do

1. Check the amount of money coming into your account on your statements. You'll usually see this in its own column. Don't include one-off or occasional payments such as gifts or bonuses as these may not be regular incomes you can rely on and may give you an inaccurate value for your budget.
2. Choose the category the amount relates to, then add the value into the box next to it. If there isn't enough space, you can use the spare boxes. If a category isn't relevant to you, leave it blank.
3. Once you've entered the amount of all the money that comes into your account in a month, they'll be added together in the total box at the bottom.

Your wages	£	<input type="text"/>
Partner's wages	£	<input type="text"/>
Benefits	£	<input type="text"/>
Pension	£	<input type="text"/>
Savings or investments	£	<input type="text"/>
<input type="text"/>	£	<input type="text"/>
<input type="text"/>	£	<input type="text"/>
Total	£	<input type="text"/>

Money out

What you need to do

1. Check the amount of money that has left your account over a month on your statements. You'll usually see this in a separate column next to your 'money in'.
2. Choose the category the amount relates to, then decide whether it's something you 'need' or 'want'. If you have more than one payment for a certain category, like food shopping, for example, you'll need to add up the total payment for that category for the entire month. If a category isn't relevant to you, you can leave it blank. Use the blank boxes for any regular payment not listed.

Needs

These are essential for you to survive and maintain a basic standard of living.

Wants

These are the things you like to spend money on but aren't needed for basic living. They include things you enjoy but can live without.

3. As you add values in the totals will calculate as either 'Needs' or 'Wants'. You'll see these combined later in the document. The two are also added together into a total for each section.

Home and property

Mortgage or rent

Council tax

Home insurance

Life insurance
